**Compared with
other martial arts
schools***

top 10% top 5%

Number of currently registered students **304**

That is, students who are currently attending regular classes or courses.
This has held stable over the past year. See also overall student number.

Overall student number **420**

Including students who have been with us in the last year but are no longer registered, and students at courses and classes where registration has not been required. This has grown by about 10% over the past year.

Number of classes each week **40**

Across all locations.

Number of regular locations taught at **22**

Not including workshops and events.

Number of martial arts taught **5**

Not including DFS, which although part of LCTKD has no UK students

Number of qualified teachers **19**

Includes Instructor levels from Tutor and above. Not including Assistant Instructor or lower.

%age of female teachers **58**

Includes Instructor levels from Tutor and above. Comparison is with larger schools.

%age of female students **59**

Across all our arts. Comparison is with larger schools.

% female students of Fighting Arts **37**

Includes TaeKwonDo, Kickboxing and Ensodo. This figure is lower than the 50% we achieved a couple of years ago, but is still far higher than most schools.

Age range overall **5-88**

Includes all our arts, but counts only registered students. So students at care homes doing seated Tai Chi, though older, are not included. Youngest student does TaeKwonDo, and the oldest Tai Chi.

See over for more interesting statistics about LCTKD

More interesting statistics about LCTKD.

These ones don't lend themselves to comparison with other schools - for example because other schools are set up differently, or have been around for a different length of time, or we just don't know enough to compare.

%age of students doing TaeKwonDo **40**

As the majority of schools only teach one art, we can't compare this.

%age of students doing Tai Chi **57**

As the majority of schools only teach one art, we can't compare this.

%age of students doing Kickboxing, Ensodo, MR **12**

As the majority of schools only teach one art, we can't compare this.

number of black belts **16**

Includes each art in which a student has a dan grade. Also includes our TKD Junior Black Belts.

Youngest student of Tai Chi **28**

Many schools have children's classes which we do not.

% male students of Tai Chi **21**

Men are under-represented in Tai Chi in the UK. We do not know enough about other schools to compare.

Oldest student of TaeKwonDo **58**

We are sure that most schools do not have TKD students of this age, but we do know that a good number have older students than that. Note that we have older students doing Ensodo and Mugai Ryu.

%age of students over 18 **67**

Across all our arts.

%age of students with us over 5 years **10**

We are relatively young for a large school, and our very first public Tai Chi class had only just started 5 years ago, so expect this figure to grow.

%age of students who joined us in the last year **40**

On average, martial arts schools have a turn over of about a third of their students each year, so it would be normal for it to be around 30%. This higher figure represents a growth in our Tai Chi classes over the past year.

%age of students at our home in Chinatown **10**

Chinatown numbers grew in the past year to make it our biggest location once again, as well as the place where we hold many courses and events.
